Friends' Family Almanac,	1
Friends' Pocket Almanac,	10

Assortment of Photograph Likenesses of Friends, etc.

Marriage Certificates, by Friends' Ceremony, filled up in the neatest manner.

OTHER BOOKS FURNISHED TO ORDER.

NOTES TO THE READER.

I. The Astronomical calculations in this work are made to true clock time. The effects of Refraction, according to the latest improved Tables of Bessel, and the Equation of time, have both been applied to the times of the Sun's rising and setting: so that the Almanac, and a good clock, will agree the year round.

II. A Time-piece may be set very nearly true by the rising, setting, or southing of the Sun, Moon, or Stars,—but more accurately by the Sun (or the southing of the Sun, or a fixed Star), anywhere on or near the 40th degree of north latitude.

III. The time of the rising, setting, or southing of a fixed Star, may be carried several days forward by subtracting, or backward by adding, 4 minutes per day.

IV. The common day of 24 hours, begins at midnight, and morning (marked morn.) continues from midnight till noon; and afternoon (marked aft.) continues from noon till midnight; this should be remembered carefully when looking for the times of the rising, setting, or southing of the Moon or Stars soon after midnight.

ECLIPSES.

In the year 1886 there will be two eclipses, both of the Sun.

I. An annular eclipse of the Sun on the 5th of Third Month, visible as a partial eclipse at Baltimore just before sunset. This eclipse will be visible throughout the United States west of the Meridian of Baltimore.

II. A total Eclipse of the Sun on the 29th of Eighth Month, visible as a small partial eclipse at Philadelphia, beginning 6h. 8m. A. M.; greatest obscuration, 6h. 20m.; end, 6h. 32m. A. M. At Boston, begins 6h. 30m.; greatest obscuration, 6h. 40m.; ends 6h. 52m. A.M. Digits eclipsed, 0.21, southern limb.

EXPLANATION OF ASTRONOMICAL CHARACTERS.

THE PLANETS AND THEIR RELATIONS.

☉ or ☹ The Sun	♀ Venus	♃ Jupiter
☽ The Moon	⊕ The Earth	♄ Saturn
☿ Mercury	♂ Mars	♅ Uranus

☊ A Planet's ascending node.

☋ The descending node.

☌ Conjunction, or Planets situated in the same longitude.

□ Quadrature, or Planets situated in longitudes differing three signs from each other.

☍ Opposition, or Planets situated in opposite longitudes, or differing six signs from each other.

N.—North	Inf.—Inferior	Im.—Immersion
S —South	Sup.—Superior	Em.- Emersion

SIGNS OF THE ZODIAC.

1st.	♈	Aries	(0 + ..)	7th.	♎	Libra	(6 + ..)
2d.	♉	Taurus	1	8th.	♏	Scorpio	7
3d.	♊	Gemini	2	9th.	♐	Sagittarius	8
4th.	♋	Cancer	3	10th.	♑	Capricornus	9

SEASONS.

The Sun enters ♈ Third Month 20th, at 11h. A. M., when Spring commences, and the days and nights are equal.

The Sun enters ♋ Sixth Month 21st, at 8h. A. M., when Summer commences, and the longest day occurs.

The Sun enters ♎ Ninth Month 22d, at 10h. P. M., when Autumn commences, and the days and nights are again equal.

The Sun enters ♑ Twelfth Month 21st, at 4h. P.M., when Winter commences, and the shortest day occurs.

EPOCHS FOR 1886.

Dominical Letter	C.	Julian Period	6599
Lunar Cycle	6	Solar Cycle	19

Roman Indiction 14.

EMBER DAYS, 1886.

Third Month 17th, 19th, and 20th; Sixth Month 16th, 18th, and 19th; Ninth Month 15th, 17th, and 18th; Twelfth Month 15th, 17th, and 18th.

RISING, SETTING AND SOUTHING OF THE PLANETS.

It should be observed that these are not sensibly affected by the longitude of a place. When the hour is less than six, it is in the morning; when greater than six, it is in the evening.

VENUS.—Venus will be Evening Star until the 18th of Second Month, then Morning Star until the 9th of Twelfth Month, after which it will again be Evening Star for the remainder of the year. It will be at its greatest brilliancy on the 13th of First Month, in the evening, and again on the 26th of Third Month, in the morning.

MERCURY.—Mercury will be brightest about the 6th of First Month, 7th of Fifth Month, 1st of Ninth Month, and 20th of Twelfth Month, at which times it will likely be visible, being then in the East just before sunrise. It will again be brightest about the 20th of Third Month, 17th of Seventh Month, and 15th of Eleventh Month, when it will be in the West immediately after sunset.

JORDAN'S MEETING.

"The Estate and Meeting House of Jordan's, belonging to Friends of Upperside Monthly Meeting of the County of Bucks, England, is celebrated for the rural beauty of its situation, but especially for being the burial-place of several of the earlier members of the Society of Friends. As the attraction towards this spot is evidently on the increase, and as there is a manifest desire to become acquainted with all the particulars respecting it which lie within our reach; it has been thought that it would be generally acceptable, if such information could be collected and made available by publication. To establish the date of this building, extracts have been made from the deeds belonging to the estate. The first conveyance is for the year 1671, and is for land alone, "sold by William Russel to Thomas Ellwood and others, for the use of Friends, commonly called Quakers." By referring to the Friends' register, we find that this land was at once appropriated for a bury-

ing-ground; the first notice of a funeral at Jordan's being in the year in which this purchase was made. The next conveyance is dated the 14th of 12th month, 1688, and is for land and Meeting House; in this document it is mentioned, "that there are four acres of land, more or less, belonging thereunto," and from it the following paragraphs are taken:

"Whereas, since the date of these presents, the said John Penington, Peter Prince, Henry Treadway, William Grimsdale, Henry Pearce, Thomas Ellwood, Thomas Dell, and divers others of their friends before mentioned, called Quakers, have at their joint and common charge erected and built upon part of the said purchased lands, a certain house, cottage, and tenement, called by the name of New Jordan's." These buildings are elsewhere spoken of as being "for the worship of God." They are afterwards described as the "new built house and tenement, called New Jordan's." So we may fairly

conclude, that the Meeting House was erected in the year 1687–8; and this corresponds with a memorandum in the possession of a Friend at High Wycombe, which states, that the first meeting held in the Meeting House at Jordan's was on the 7th of Eighth month, 1688.

In another deed, dated 1748, we learn that there was a little more land added to the upper end of the grave-yard, given by Samuel Vandervaal, for a burial-place for himself and family; this remains to the present day separated from the rest of the ground.

Still further and equally authentic information of Jordan's is derived from the Upperside Monthly Meeting Minute Books, which date back as far as the year 1669. The earliest particular mention of Jordan's in these books, bears date Tenth month, 1673, and is a proposition for dividing Chalfont Meeting, which is to be taken under consideration by Friends, who were to meet at Jordan's the "next Fourth day of the week, the 10th instant."

First-day whereon there was formerly wont to be a meeting at Charley-wood, there shall for ye future be a meeting either at Jordan's, or at Thomas Lane's, and y^t the other meetings at Jordan's and Thomas Lane's as wel on ye First days as the fourth shal be continued as they now are, unless Friends of Chalfont Meeting shal think fit so to exchange ye days, as y^t ye meeting may not be either at Jordan's or Thomas Lane's on two First-days together.

"Thirdly. That to the intent Friends may have ye benefit and satisfaction of seeing and being refresht in one another sometimes, and of waiting upon ye Lord together, there shal be a constant Monthly Meeting, comprehending the Friends of Chalfont Meeting, Charley-wood, Watford, and Flaunden, which meeting shall be held at Charley-wood, upon ye second Sixth-day in one month, and on ye second Fourth-day in ye next month, and so kept on in a continued course."

The next minute of interest having reference to Jordan's, oc-

curs in the Twelfth month of the year 1692, when William Grimsdale acquainted the meeting, "y^t ye Friends of Chalfont Meeting have a desire to remove their meeting from Tyler's, where it is every other First-day, to Jordan's, where ye rest of ye meetings are, as being more convenient for ye greatest part of their meeting, and likely to be more for ye service of truth, and were willing to do it with the unity of this meeting. Whereupon this meeting enquired whether ye Friends of y^t meeting were generally satisfied therewith; and being assured y^t ye most part of them were satisfied; and those few who were not, were content to condescend and yield to the rest therein; this meeting approved ye proposal, and left it to ye Friends of y^t Meeting to settle."

After this arrangement, it would seem that Jordan's went under the name of Chalfont Meeting. This we infer from the following minute, bearing date Eleventh month, 1694, from which we may also learn

the number of meeting houses then existing in Upperside Monthly Meeting: "There being so many of George Fox's Journals sent into this county, as there are public meeting houses built, and possessed by Friends, as their right, which books were ordered by William Mead, of London, to be given gratis to every such Meeting House, one for ye general service of ye Friends of those respective meetings; five of those books were now distributed as followeth, viz.: to the Friends of Chalfont Meeting, who meet at New Jordan's, one; to the Friends of Watford Meeting, one; to the Friends of Chesham Meeting, one; to the Friends of Tring Meeting, one; and to the Friends of Wycombe Meeting (who stand faithful in their testimony against the separation and separate meetings set up there by John Raunce and his party), one."

Having now established Jordan's as a regular meeting for worship, we may proceed to notice when it was first used for the Monthly Meetings. At the

earliest period to which the books have reference, the Monthly Meetings were principally held at William Balls' house; but in 1670, the Ninth Month Meetings were at Thomas Ellwood's, at Hunger Hill, and from this time they were held there without intermission until his death, in 1713. After this, Friends still met at Hunger Hill until the Twelfth Month, 1727, when we have the following minute: "This meeting, understanding that this house is now let to a person not of our profession, therefore it is thought inconvenient that our Monthly Meetings should be holden any longer at this place.

"Upon deliberate consideration where our meetings might be held for the future, it was the general opinion of Friends that if it should be movable to the several meetings constituting this, it would conduce more to the service of truth, and general comfort of Friends, than to be fixed in one place. Therefore it is unanimously agreed, that for the space of one year the Monthly Meetings be held as followeth, viz.: First, Fifth, and Ninth

Month, at Wycombe; Second, Eighth, and Eleventh, at Aylesbury; Third, Sixth, and Tenth, at Chesham; and Fourth, Seventh, and Twelfth, at Jordan's." And in a minute the year after, it is stated, that this arrangement of the Meetings "was to be continued as long as Friends may see it convenient." And with a little alteration as to the times, Monthly Meetings were held at Jordan's until the year 1799, when they were discontinued altogether. But from the general interest taken in this spot, and the unanimous desire which was felt once more to renew former associations, a Monthly Meeting was again established there in the year 1851, for the first Fifth-day in the Sixth Month, and this arrangement is kept up. There is no notice to be found as to when the meetings for worship were discontinued, but the last time Jordan's is mentioned as sending representatives to the Monthly Meeting is in the year 1787; so in all probability it was at that date. In this interim of half a century,

TENTH MONTH, 1886.

some of our ministers have occasionally held public meetings at Jordan's, one or more marriages have been solemnized, and several interments have taken place.

Jordan's Meeting House itself is a plain brick building, with tiled roof and lattice windows. There is a cottage adjoining it, which has three rooms, a ground floor, and two chambers. The principal chamber was evidently used in former times as a gallery in overcrowded meetings, as it communicated with the meeting by means of shutters, and it is where the women Friends now hold their meetings for business. The stabling which is behind, and attached to the building, is capacious, and will accommodate eighteen or twenty horses. We speak of the over-crowded meetings, but to those who know the locality, such may be difficult to imagine, the situation of Jordans being peculiarly picturesque and sequestered. It stands in reality upon rather high ground, but its immediate site is in a dell, surrounded by meadows and beech-woods; there is

one rather large dwelling house within sight of Jordan's, called Stone Deane, which in former times was a residence of Friends; with this exception, the visitor may ramble for some distance without passing any sort of habitation but an occasional homestead. It is a thoroughly agricultural district, and is both primitive and peaceful in its character. Those, however, who have had the opportunity of perusing the old Monthly Meeting minutes, will find that almost every small town and hamlet in the neighborhood had once its quota of Friends, though now so destitute. Attracted by the natural beauties of the scenery, and the more solemn interest of that particular spot, many parties, of all denominations, are tempted to pass a few hours at Jordan's. An album is kept in the Meeting House, in which every visitor is expected to inscribe his or her name. The burying ground is nearly full but only a few of the graves can be identified; these are tenanted by William Penn, Gulielma

Maria Penn, Springett Penn, Letitia Penn, and five of William Penn's children who died young. Also, Isaac Penington, Mary Penington, John Penington, Thomas Ellwood, Mary Ellwood, Mary Frame, and Joseph Rule; and in the piece of ground before alluded to there is a vault wherein Samuel Vandervaal and his wife are interred.

In a memorandum found amongst the papers of the late B. Anderson, Vicar of Penn, and headed, "Some particulars relative to Jordan's burial-ground," we find that, contrary to the rest, William Penn's head lies to the south, and the remains of his second wife, Hannah Callowhill, are laid upon his; also, "that Prince Butterfield related that he saw William Penn's leaden coffin, when the grave was opened to bury his second wife."—*Selected.*

Press forward to the perfect mind;
Keep thy heart calm all day,
And catch the words the Spirit there
From hour to hour may say.

COUNT OXENSTIERN,

Chancellor of Sweden, a person of the first quality, station, and ability, in his own country, and whose share and success not only in the chief ministry of affairs in that kingdom, but in the greatest negotiations of Europe, during his time, made him no less considerable abroad. After all his knowledge and honor, being visited in his retreat from public business, by Whitlock, ambassador from England, to Queen Christina, in conclusion of their discourse, he said to the ambassador, "I have seen much and enjoyed much of this world, but I never knew how to live until now. I thank my good God that has given me time to know him, and to know myself. All the comfort I have, and all the comfort I take, and which is more than the whole world can give, is feeling the good spirit of God in my heart, and reading in this good book (holding up the Bible) that came from it." And further addressed himself to the ambassador: "You are now in the prime of your age and vigor, and in great favor and business; but this will all leave you, and you will one day better understand and relish what I say to you; and then you will find that there is more wisdom, truth, comfort, and pleasure in retiring and turning your heart from the world, to the good spirit of God, and in reading the Bible, than in all the court and favor of princes." Very interesting sentiments, when we consider from whom they came, one of the greatest and wisest men of his age, while his understanding was as sound and vigorous, as his experience and knowledge were great.—*Selected.*

BULSTRODE WHITLOCK

Was a scholar, a lawyer, and a statesman; in short, he was one of the most accomplished men of the age. In his retirement, he was visited by a friend, to whom, after making many serious observations, he expressed himself in the follow

ing manner. "I have ever thought," said he, "there has been but one true religion in the world, and that is, the work of the spirit of God in the hearts and souls of men. There have been indeed divers forms and shapes of things, through the many dispensations of God to men, answerable to His own wise ends, in reference to the low and uncertain state of man in the world; but the old world had the spirit of God, for it strove with them; and the new world has had the spirit of God, both Jew and Gentile; and it strives with all; and they that have been led by it, have been the good people in every dispensation of God to the world, and I myself must say, I have felt it from a child to convince me of my evil and vanity, and it has often given me a true measure of this poor world, and some taste of divine things; and it is my grief I did not more early apply my soul to it. For I can say, since my retirement from the greatness and hurries of the world, I have felt something of the work and comfort of it, and that it is both ready and able to instruct and lead, and preserve those that will humbly and sincerely hearken to it. So that my religion is the good spirit of God in my heart; I mean, what that has wrought in me and for me." And after a meeting at his house, to which he gave an entire liberty for all that pleased to come; he was so deeply affected with the testimony of the light, spirit, and grace of Christ in man, as the gospel dispensation; that after the meeting closed in prayer he rose up, and pulled off his hat, and said, "This is the everlasting gospel I have heard this day; and I humbly bless the name of God that he has let me live to see this day, in which the ancient gospel is again preached to them that dwell upon the earth." —*Wm. Penn.*

A BRIEF GENEALOGY OF EDWARD FOULKE,

Originally written in British.

I, Edward Foulke, was the son of Foulke Thomas, the son of Evan, the son of Thomas, the son of Robert, the son of David Lloyd, the son of David, the son of Evan Vaughan, the son of Griffith, the son of Madock, the son of Jerworth, the son of Madock, the son of Rhirid Flaidd, of the Poole, who was Lord of Penllyn, one of the northern divisions of Wales. My mother's name was Lowry, the daughter of Edward, the son of David, the son of Ellis, the son of Robert, of the parish of Llanvor in Merionethshire. I was born on the 13th day of the 5th month, A. D. 1651, and when arrived at mature age I married Eleanor, the daughter of Hugh, the son of Cadwallader, the son of Rees, of the parish of Spytu, in Denbighshire. Her mother's name was Gwen, the daughter of Ellis, the son of William, the son of Hugh, the son of Thomas, the son of David, the son of Madock, the son of Evan, the son of Cott, the son of Evan, the son of Griffith, the son of Madock, the son of Einion, the son of Meredith, of Cawvadock, and was born in the same parish and shire with her husband.

I had by my said wife four sons, viz.: Thomas, Hugh, Cadwallader, and Evan, and five daughters, Gwen, Grace, Jane, Catharine, and Margaret.

We lived at a place called Coed-y-foel, a farm belonging to Roger Price, Esq., of Rhewlass, in Merionethshire aforesaid. But in process of time I had an inclination to remove thence with my family to the province of Pennsylvania, and in order thereto we set out on the 3d day of the 2d month (April), A. D. 1698, and came in two days to Liverpool, where, with divers others who intended to go the voyage, we took shipping the 17th of the same month on board of the Robert and Elizabeth, and the next day set sail for Ireland, where we arrived and stayed until the 1st of the 3d month (May), and thence sailed again for Penn-

sylvania, and were about eleven weeks at sea. And the sore distemper of the bloody flux broke out in the vessel, of which died five and forty persons in our passage. The distemper was so mortal that two or three corpses were cast over every day while it lasted. But through the favor and mercy of Divine Providence I, with my wife and nine children, escaped that sore mortality, and arrived safe at Philadelphia about the 17th of the 5th month (July), where we were kindly received and entertained by our friends and old acquaintances, until I purchased a tract of about 700 acres of and about 16 miles from Philadelphia, on a part of which I settled. And divers others of our company who came over sea together settled near me about the same time, which was the beginning of November, 1698, aforesaid, and the township was named Gwynedd, or North Wales. This account was written the 14th of the 11th month (January), A. D. 1702, by Edward Foulke.—*Friends' Miscellany.*

BE KIND.

Be kind, for kindness speaks
  A language quite her own,
The charms she hath, the good she seeks,
  To all mankind are known.
The rudest savage feels her sway,
  She rules the most refined,
And seems in pleading tone to say,
  "Whoe'er thou art, *be kind.*"

Be kind. If love should dwell
  Wherever man is found,
It should in beauty most excel
  Where Christians most abound.
Reciprocated kindness there,
  With every grace combin'd,
Should set the world example fair,
  And teach it to *be kind.*

Be kind. The gentle rain,
  The bright and glorious sun,
And every source whence good we gain,
  Are kept by God from none.
But "both the evil and the just,"
  By goodness undefined,
Alike are blest. Then, if ye trust
  In God, ye should *be kind.*

Be kind to ev'ry *friend,*
  This Friendship's self demands;
Be kind to *foes* who sore offend,
  For this your Lord commands.
Let not the Christian cause, through you,
  Be weakened or maligned;
In all ye say, in all ye do,
  Be courteous—*be kind.*

Be kind to erring ones;
  The best of men aver
That he who most pollution shuns
  Feels most for those who err.
There is no human will so strong
  That kindness cannot bind;
Justice must punish what is wrong,
  Yet justice can *be kind.*

Be kind. If ye are *rich,*
  Ye need, indeed, take care;
For God hath given wealth, of which
  The *poor* should have a share.
Ye may be *bountiful,* but yet
  To Charity be blind;
Ye may *give freely,* but forget
  Ye also should *be kind.*

Be kind. If ye are *poor*,
  Ye know how kindness smooths
The roughest fortunes ye endure,
  And how it sorrow soothes;
Ye know ye may receive relief,
  Yet *sympathy* not find;
Then learn to sympathize with grief—
  The poorest can be kind.

Be kind. If ye are *old*,
  Love may not light your eye;
The strongest *passion* may grow cold,
  But *virtue* cannot die.
There is respect from youth to you,
  By God and men assign'd;
Let your deportment claim it too:
  Ye aged ones, *be kind.*

Be kind. If ye are *young*
  And free, as yet, from cares,
Remember ye must walk among
  Unnumbered ills and snares;
"The small sweet courtesies of life"
  For mortals were design'd,
To nurture peace—to banish strife;
  Employ them, and *be kind.*

Be kind. Why should you not?
  If constant friendship cheers
And makes more bearable your lot
  In this our "vale of tears."
Oh! think how different your fate
  Had you neglected pined;
If kindness shown to you be great;
  Oh! should you not *be kind?*

Be kind. Why should you not?
  If faithful friends are few,

And if you seem to be forgot
  By those you once deem'd true,
Should you not sympathize with those
  To cold neglect consign'd?
Can you not feel for other's woes?
  Oh! should you not *be kind?*

Be kind. Forget—forgive
  The wrongs which ye receive;
Oh! strive in love with *all* to live,
  This world ye soon must leave.
Then cultivate a gen'rous mind,—
Live peaceably with all mankind,—
And those at death ye leave behind
Will bless your mem'ry, and—*be kind.*
—*Selected.*

THE AGE OF A PYRAMID.

Modern scholarship seems destined to win its most signal triumphs through the application of a careful scientific method to its researches into the past history of our race. It multiplies its aids, extends the range of its evidences, and by looking far beyond the field of the old chroniclers, is at last able to correct their discrepancies. Where the records of earth are at variance, it consults the unerring stars, and fixes the chronology of events more wisely than the historian who wrote only a few generations after their occurrence. The German astronomer, Hansen, was one of the first to determine the day and hour of an ancient battle by calculating the eclipse of the sun which occurred at the same time; and now the French Egyptologists, profiting by the remarkable astronomical knowledge of the old Egyptians, are applying the same methods of verification, with wonderful success, to the hieroglyphic records.

At the meeting of the French Academy of Inscriptions, on the 7th of April, M. de Sauley read a paper in regard to a discovery by the scholar Chabas, which for the first

time introduces a positive date into the oldest Egyptian history. Hitherto the distinguished Egyptologist, M. de Rouge, has only succeeded in establishing three dates with absolute certainty — the years 1300, 1240, and 962, B. C., the last of these being that of the taking of Jerusalem by Sheshonk I., the *Shishak* of the Bible. But two or three months ago M. Chabas was fortunate enough to succeed in reading a doubtful *cartouche* (royal name, inclosed in an oval figure), in the famous Ebers papyrus, a fac-simile of which was published last year. It proved to be the name of the Pharaoh, Menkeres, the Mycerinus of the Greek historians, and the builder of the third or smallest pyramid at Gizeh. Attached to the cartouche was an astronomical note, stating that the heliacal rising of the star *Sothis* occurred in the ninth year of the reign of Menkeres.

The ancient Egyptians had the habit of signalizing important political events by some contemporaneous astronomical phenomenon. Many of the latter could scarcely be identified or determined now; but since we know that their *Sothis* is our star Sirius, we are easily able to fix the rare periods of its heliacal rising. This is the astronomical term used when a star, after being in conjunction with the sun and invisible, emerges from the light sufficiently to be seen just before sunrise. M. Chabas immediately took his discovery to the astronomer Biot, who made the necessary calculations, whence it appears that the heliacal rising of *Sothis*, in the ninth year of the reign of Menkeres, must have taken place between the years 3007 and 3010 B. C. M. de Sauley stated that he had made the calculation independently, and with precisely the same result; he was entirely convinced of the correctness of the date. As the first assured step toward establishing, if only in its general outlines, the chronology of the ancient Egyptian empire, this discovery is of incalculable importance. It fixes the age of the third pyramid of Gizeh at about 4,880

years, and antedates by fully 1,770 years the earliest accurately ascertained point in ancient chronology.

These detached epochs are like so many solid piers in the flood of Time, and, though still too far apart to be bridged, they furnish secure resting places for the historian. It is not too much to expect, that when the aid of astronomy is called to the investigation of the Assyrian as well as the Egyptian records, we may restore the chronological charts of both empires from the silent testimony of the heavens. —*N. Y. Tribune* (1876.)

Josiah Quincy, President of Harvard College, lived to be ninety-two years of age. He had kept a journal for many years. He was accustomed to sit in the morning in a large chair with a broad arm to it, which served as a desk, and upon which he wrote his journal. July 1st, 1864, he sat down in his chair as usual. His daughter brought him his journal. He at first declined his wonted task, but his daughter urged him not to abandon it. He took the book, and wrote the first verse of that noble hymn of Addison,

"When all thy mercies, O my God,
My rising soul surveys,
Transported by the view, I'm lost
In wonder, love, and praise."

The weary head dropped upon the bosom. The volume was ended; the soul had risen.— *Selected.*
